I am a 3rd year Engineering student and a web developer skilled in both backend and frontend development. My expertise lies in **JavaScript, Node.js, React.js, MongoDB, and MySQL**. I have successfully completed numerous projects utilizing these technologies, and I also have experience with **Kafka, Redis, and Socket.io**. I am eager to get an internship where I can further enhance my knowledge and skills in these areas while making valuable contributions to the company's development.

## Projects

### WEB CHAT APPLICATION

Jan 2024- Present

- A WhatsApp Web like chat Application created using **MERN stack** and powered by **Socket.io, Kafka, Redis**.
- Add other users as friends
- Send and receive messages to friends whether online or offline
- Scalable upto 10,000 users
- Github Link : [https://github.com/AmaanRS/Web\\_Chat\\_Application](https://github.com/AmaanRS/Web_Chat_Application)

### CAMPUS CONNECT

May 2024- Present

- Campus Connect is a website developed using **TypeScript, React, MongoDB, and Express** designed for college students to share events happening on campus.
- Committees can post the events they are hosting, and committee heads can seek permissions from the HOD and principal directly through the platform.
- Github Link: <https://github.com/AmaanRS/CampusConnect>

### CV GENERATOR

Aug 2023- Nov 2023

- CV generator, a website to generate CV online created using **MERN stack**
- Answer some questions about your CV and get it made automatically
- User can choose from 3 different templates
- Github Link: <https://github.com/AmaanRS/CV-Generator>

### BOOKTURF

July 2023- Nov 2023

- A website created using **Python Django, MYSQL** for booking a turf online
- Choose a turf and reserve it for a specific time frame
- Created this website for a customer
- Github Link: [https://github.com/AmaanRS/BookTurf\\_Main](https://github.com/AmaanRS/BookTurf_Main)

### BLOODSHARE

28th Feb 2024

- A website created using the **MERN stack** as a group project for finding hospitals to donate blood online.
- Users can request blood types in emergencies and a map will guide users to the donation location.
- Allows users to check the availability and quantity of different blood types within each state and their specific locations.
- Github Link: <https://github.com/AmaanRS/BloodShare>
